

AMPOL-MEROL®
Reliable Partner of Your Farm

Comprehensive supply of agriculture

About a firm

The Ampol-Merol group is a leading supplier for the agricultural production means. Our company has been an integral part of the Polish agricultural sector for almost 30 years.

Ampol-Merol Sp. z o.o. has been an authorised distributor of agricultural products since 1992 and has won the trust of farmers in Poland and abroad. We believe that man is always in the first place. Our company relies on experts, innovativeness, and exclusively tried and tested products.

Our mission is to increase agricultural efficiency by distributing the most effective products of the highest quality.

Only this way can we meet the needs of our most demanding clients.

With 30 branches across Poland, we can ensure ongoing product availability. All orders are shipped to any location in the country, irrespective of their size.

The connection of tradition, innovativeness and a scientific approach is a source of our technological development.

Close cooperation with institutions and universities is a guarantee of the highest quality and effectiveness.

Specialised field experience tested on our farms is a real verification of the condition of rape, cereal and corn.

Many prizes are the best reason to be proud of and a stimulus to the further hard work.

Seeds

Any agricultural production begins with seeds. This statement accurately conveys the importance of choosing the right seed material.

Our know-how and cooperation with certification bodies allow us to only select seeds with the best genetic potential available in Europe. Our consultants will help you utilise that potential to the greatest extent possible.

Offer:

- spring and winter cereal
- spring and winter rape
- corn
- fodder grasses
- legumes
- catch crop seeds

Mineral fertilisers

Fertilisers are a wide range of agents that influence crop yield and quality. Their appropriate composition and form help deliver the necessary nutrients to the soil and the crop itself.

The application of mineral fertilisers is key for crop growth. Ampol-Merol offers a wide range of tried and tested fertilisers whose composition and structure ensure a correct level of element content in the soil and help deliver all the necessary nutrients. Our offer comprises nitrogen fertilisers, liquid nitrogen fertilisers, nitrogen + sulphur fertilisers, liquid nitrogen + sulphur fertilisers, NPK Nitrofoska, compound NPK and PK fertilisers, potassium fertilisers, and magnesium fertilisers.

Offer:

- nitrogen fertilisers
- liquid nitrogen fertilisers
- nitrogen + sulphur fertilisers
- liquid nitrogen + sulphur fertilisers
- NPK Nitrofoska
- compound NPK and PK fertilisers
- potassium fertilisers
- magnesium fertilisers
- calcium fertilizers

Crop protection products

Ampol-Merol is a recognised distributor of original and tested crop protection products. A wide range of fungicides, herbicides and insecticides makes it possible to select appropriate preparations for prophylaxis and intervention for such crops as cereals, rape, corn, vegetables, and many others. An appropriate dosage of active substances and spraying intervals are fundamental for integrated crop protection. This is why we prepare practical charts and protection programmes that help you achieve maximum yields.

Offer:

- fungicides
- herbicides
- insecticides
- adjuvants
- regulators of heights

Company of new technologies – – we set standards in fertilization

Balanced component composition

MacroSpeed® OPTIMA PK (Ca, S) 18-30 (6-6,5) + Zn 0,3%; Mn 0,2%
MacroSpeed® PERFECT PK (Ca, S) 15-30 (7-10,5) + Zn 0,5%

- Facilitates the development of the root system (better drainage in the soil profile, large absorption surface for nutrients and water, greater resistance to drought)
- Increases the effectiveness of utilisation of other nutrients
- Improves the plants' vigour, condition and health
- Increases resistance to stress factors
- Increases the plants' frost-resistance
- Shapes the size and quality of the yield

Highest quality, perfect granularity

MacroSpeed® GREEN MgO 25%, SO₃ 50%

- Increases the effectiveness of photosynthesis
- Regulates the transport of assimilates and their metabolites
- Intensifies the growth of the root system
- Increases nitrogen's yield-stimulating effect
- Improves the plants' health
- Improves resistance to adverse weather conditions

www.caldena.com

Agravita® Aktiv Stimulates the growth of a crop

AGRAVITA® AKTIV 48
NPK 8-20-20

+ boron, copper*, iron*, manganese*, zinc*

* chelated microelements

STIMULATES CROP GROWTH

- Completely soluble in water
- Recommended throughout the vegetation period
- Stimulates the growth of the root system
- Regenerates the plants after herbicide and frost damage etc.
- Improves the plants' condition and vigour
- Increases resistance to abiotic and biotic stress
- Regulates vegetative growth

Produced in the USA

Fast and complex solubility

Effectiveness certified by many perennial laboratory research

AGRAVITA® AKTIV 70
NPK 10-52-8

+ boron, copper*, iron*, manganese*, zinc*

* chelated microelements

STIMULATES CROP GROWTH

- Completely soluble in water
- Especially recommended before blooming
- Improves metabolite transport and storage
- Evens out plant blooming
- Increases the quantity of siliques, caryopses, seeds, and fruit buds
- Improves the condition and vitality, and maintains leaf verdure
- Increases resistance to stress conditions
- Regulates generative growth

Animal feed

Feeding animals appropriately guarantees a high-yield herd. In order to satisfy the nutritional needs of farm animals, we have based our offer on cooperation with recognised fodder manufacturers (below).

The knowledge and experience of our experts is at your disposal in selecting appropriate components and creating efficient feeding programmes depending on the animal age group.

Pastures for animals

DARVITmax products are pastures of a high quality and extend the production of animals.

DARVITmax is the product of a high content of proteins, especially soya with easily digested proteins and a high amount of aminoacids. The product supplies nutrients and vitamins to animals.

Offer:

- protein middlings
- cereal bran
- cereal middlings
- beet pulp
- oils
- complete feeds
- concentrates
- premixes
- milk replacers
- feed additives
- ensiling products
- acidifiers
- disinfectants

Partners:

- Alltech Poland Sp. z o.o.
- Cargill Poland Sp. z o.o.
- De Heus Polska Sp. z o.o.
- Golpasz SA
- Sano Sp. z o.o.
- Trouw Nutrition Polska Sp. z o.o.

Crop packaging

Nets, films and ropes are crop packaging materials that constitute an integral part of producing animal feed with the best possible nutritional value which, in turn, translates into body mass growth in cattle and higher milk yield in dairy cows.

It is crucial to avoid waste during packing so as to ensure easy crop handling, transportation and storage.

Nonwovens, foils, nets, tapes
Quality and safety of Your crops

The foil of haylage
The guarantee of strength and resistance

Offer:

- UV-resistant haylage films that guarantee resistance and durability
- silage films that help maintain an appropriate temperature for the acidification process and protect silage from weather conditions
- ropes that guarantee durability and top quality

Partners:

- John Deere
- Pype Agro & Geo Textiles
- Tissubel
- Advance

Dimensions:

- 500 mm x 1800 m
- 750 mm x 1500 m

Thickness: 25 µm

Layers: 5

The method of production: Blown

Material: mLLDPE

Colour: white

Purchasing agricultural produce

Points of sale

Ampol-Merol Sp. z o.o. offers its Customers comprehensive assistance. Appropriate storage is just as crucial as high yields.

Ampol-Merol conducts year-round purchases of human-edible and feed grains such as wheat, rye, barley, triticale, rape, pulses and corn across the country. The company's warehouse can hold over 80,000 tonnes of crops.

Our operations comply with the REDcert and GMP+ certificates which guarantee high quality.

Ampol-Merol organises crop transportation from the producers on its own; the dates and payment terms are adapted to the individual needs of respective Customers.
